

Title: Infrastructure Architect

Team: Engineering

Location: Seattle, WA; Remote

Company Description

Alexandria Technologies is building a platform to make it easier for people to annotate the things they're reading or listening to – like books, audiobooks, or podcasts – so they can build out their own personalized library of insights. They will then have the opportunity to share their notes and thoughts in order to have deeper conversations on common topics. We aim to create a community knowledge network.

We are a mission-focused company. To that end, Alexandria Technologies is incorporated as a public benefit corporation – you can read our commitments [here](#) – and will be seeking to eventually become a [steward-owned company](#) to solidify our mission.

About the Role

This role provides the unique opportunity to help lay our technical foundation. The Infrastructure Architect will play a pivotal role in designing and building scalable infrastructure for the platform. This means working with leadership to develop and help build the data architecture and security measures that will be part of the backbone of the platform.

As the platform and company grow, they'll be expected to take a leading role in helping build and shape the engineering department.

The ideal person for the role is someone with experience in building and/or maintaining SaaS, ecommerce, or social networking platforms; preferably all three. Additionally, they will also have experience building and managing teams. Regardless, this position requires strong people skills and the ability to work collaboratively.

Job Qualifications

- Know how to write well-tested, maintainable code
- Either know or be willing to learn about data architecture, cybersecurity, machine learning/AI
- Strong problem-solving skills and ability to communicate complex concepts to both technical and non-technical audiences
- Aware of or willing to learn about recruiting/hiring strategies for high performing engineering teams
- Excellent communication skills, leads with kindness & curiosity, always looking to improve

Nice-to-haves

- A love of books, audiobooks, and/or podcasts
- An avid note-taker
- A humane/responsible tech certificate/degree
